

GENERALI STABILNY WZROST

Stable growth sub-fund

The investment objective of the sub-fund is a long-term increase in the value of assets as a result of investment value growth. The sub-fund invests mainly in debt instruments – no less than 60% and equity instruments – no more than 40%. The sub-fund invests mainly in Poland. It may also invest in foreign markets. When determining the share of stocks and debt securities in sub-fund assets, factors that determine the stock market situation will be considered, as well as development and profitability prospects for debt securities.

Sub-fund performance vs. benchmark

Risk level

The presented percentage risk index is based on the Key Investor Information Document. The index is determined based on volatility of the equivalent of the value at risk (which relies on unit's historical prices) resulting from the adopted investment policy, and on the credit risk of the sub-fund. The index value may change. Even the lowest risk category does not mean that a given sub-fund is risk-free. The index does not include e.g.: liquidity risk, currency risk, contracting party risk, operational risk, sustainability risk or financial technique risk. The detailed description of risks associated with investing in a given sub-fund may be found in the prospectus available on www.generali-investments.pl.

Dictionary

Beta to benchmark – this ratio shows the relation between changes in the value of a fund unit and the benchmark. Beta of 1 means that changes in the value of a fund unit are the same as of the benchmark, which suggests that the composition of instruments in the fund is the same as the composition of instruments in the benchmark. Beta below 1 means that a growth (decrease) in the benchmark by 1% is usually connected with a growth (decrease) in the value of a fund unit by less than 1%. Beta over 1 means that a growth (decrease) in the benchmark by 1% is usually connected with a growth (decrease) in the value of a fund unit by more than 1%.

Beta to WIG – this ratio shows the relation between changes in the value of a fund unit and changes in the WIG index. Beta of 1 means that changes in the value of a fund unit are the same as changes in the WIG index. Beta below 1 means that a growth (decrease) in the benchmark by 1% is usually connected with a growth (decrease) in the value of the WIG index by less than 1%. Beta over 1 means that a growth (decrease) in the WIG index by 1% is usually connected with a growth (decrease) in the value of a fund unit by more than 1%.

Information ratio – this ratio shows the profitability of risk borne by the fund compared to its benchmark. The higher the information ratio, the lower the risk at which the return of the fund is generated compared to the benchmark. The fund with the information ratio over 0.3 is considered as effectively managed.

Tracking error – this ratio shows how risky the given fund is compared to its benchmark. The higher the ratio, the more aggressively is the fund managed compared to its benchmark. The ratio is used to compare the risk of funds with a similar profile (e.g. equity funds).

Sharpe's ratio – this ratio shows the profitability of risk borne by the fund compared to safe investments (e.g. treasury bonds). The higher the Sharpe's ratio, the lower the risk at which the return of the fund is generated compared to safe investments.

Standard deviation – this ratio shows how risky the given fund is. The higher the ratio, the more volatile the price of a fund unit. This ratio is used to compare the risk of funds with a similar profile (e.g. equity funds).

Duration – this ratio shows the change in the value of the debt part of the fund in reaction to a change in interest rates. The higher the duration, the bigger effect of a change in interest rates on a change in the value of a fund unit i.e. the higher the risk connected with the same.

YTM – (yield to maturity) – this ratio shows the rate of return that investors obtain when buying a bond at the current market price and holding it in their portfolio until maturity.

All documents are in Polish. Individual sub-funds' investment risks are described in sections "Description of risks associated with investing in Sub-fund Units, including risks pertaining to the adopted investment policy of the Sub-fund," and "Description of investment risks associated with holding units in a Sub-fund." Unit holders' rights are specified in the Prospectus in section "Concise description of Unit Holders' rights."

Neither the Company nor the investment funds guarantee that investment goals will be achieved. By investing in mutual funds, you purchase units (shares in these investment funds) and not the underlying assets invested by the fund. No investment is risk-free. Unit holders need to be prepared for a possible decrease in or a loss of money invested. The individual return on investment is not the same as the sub-fund's investment performance and it depends on the value of the unit at the time of its sale and repurchase by the fund, as well as on fund fees and taxes applicable to the income earned on the investment. Taxation depends on the client's situation and it may change in the future. The presented financial information relates to a specific past period and the results achieved in the past do not guarantee returns on future investments. The result will differ depending on the market situation and period for which the investment is held. The presented results are exclusive of a given sub-fund's fees and taxes.
