

GENERALI AKCJI RYNKÓW WSCHODZĄCYCH

Equity sub-fund

The sub-fund's investment objective is to achieve a long-term increase in the value of assets as a result of investment value growth. Generali Akcji Rynków Wschodzących is a sub-fund which offers exposure to stocks of companies from global emerging markets, including fast growing economies as represented by the MSCI Emerging Markets index. Generali Akcji Rynków Wschodzących invests mainly in units or shares issued by foreign funds or collective investment institutions domiciled abroad whose investment policy assumes the investment of more than 50% of their assets in stocks of companies domiciled or having significant operations in countries classified as emerging markets, or ensures exposure to stocks of such companies or a true reflection of emerging markets equity indices. In addition, the sub-fund may invest in stocks and other equity instruments. Some of its assets may represent other asset classes listed in the statute. The exchange rate risk is being hedged by transactions in foreign currency derivatives.

On September 1, 2022, the investment policy and the name of the sub-fund changed. Old name of the sub-fund – Generali Akcje: Nowa Europa.

Sub-fund performance vs. benchmark

Risk level

The presented percentage risk index is based on the Key Investor Information Document. The index is determined based on volatility of the equivalent of the value at risk (which relies on unit's historical prices) resulting from the adopted investment policy, and on the credit risk of the sub-fund. The index value may change. Even the lowest risk category does not mean that a given sub-fund is risk-free. The index does not include e.g.: liquidity risk, currency risk, contracting party risk, operational risk, sustainability risk or financial technique risk. The detailed description of risks associated with investing in a given sub-fund may be found in the prospectus available on www.generali-investments.pl.

Dictionary

Beta to WIG – this ratio shows the relation between changes in the value of a fund unit and changes in the WIG index. Beta of 1 means that changes in the value of a fund unit are the same as changes in the WIG index. Beta below 1 means that a growth (decrease) in the benchmark by 1% is usually connected with a growth (decrease) in the value of the WIG index by less than 1%. Beta over 1 means that a growth (decrease) in the WIG index by 1% is usually connected with a growth (decrease) in the value of a fund unit by more than 1%.

Sharpe's ratio – this ratio shows the profitability of risk borne by the fund compared to safe investments (e.g. treasury bonds). The higher the Sharpe's ratio, the lower the risk at which the return of the fund is generated compared to safe investments.

Standard deviation – this ratio shows how risky the given fund is. The higher the ratio, the more volatile the price of a fund unit. This ratio is used to compare the risk of funds with a similar profile (e.g. equity funds).
