

GENERALI AKCJE: NOWA EUROPA

Central and East Europe equities

The sub-fund invests mostly in stocks of issuers from Central and Eastern Europe or stocks of issuers operating mainly in the area of Central and Eastern Europe, as well as in depositary receipts, e.g. ADR or GDR. The share of stocks and other equity securities in the sub-fund's assets will not be lower than 60%. Stocks of issuers from Central and Eastern Europe are understood as the stocks issued by issuers from such countries as Lithuania, Latvia, Estonia, Poland, Czech Republic, Slovakia, Hungary, Slovenia, Turkey, Russia, Ukraine, Macedonia, Croatia, Bosnia and Herzegovina, Serbia, Montenegro, Albania, Bulgaria, Romania, Cyprus and Kazakhstan. Investments of the sub-fund in stocks and other securities are made, above all, based on the fundamental analysis; in particular, in the case of equity securities, the basic criteria will be determination of the market and technological advantages of companies and the quality of business management.

Sub-fund performance

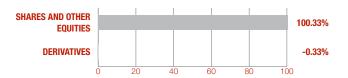

Sub-fund performance*

	1 month	3 months	6 months	1 year	2 years	5 years	10 years
Generali Akcje: Nowa Europa (%)	2.36	1.89	1.62	0.58	-7.29	29.68	50.63

Risk measures (for 12 months)

Beta to WIG	0.61
Sharpe's ratio	-0.08
Standard deviation	9.83%

Dictionary

Beta to WIG – this ratio shows the relation between changes in the value of a fund unit and changes in the WIG index. Beta of 1 means that changes in the value of a fund unit are the same as changes in the WIG index. Beta below 1 means that a growth (decrease) in the benchmark by 1% is usually connected with a growth (decrease) in the value of the WIG index by less than 1%. Beta over 1 means that a growth (decrease) in the WIG index by 1% is usually connected with a growth (decrease) in the value of a fund unit by more than 1%.

Sharpe's ratio - this ratio shows the profitability of risk borne by the fund compared to safe investments (e.g. treasury bonds). The higher the Sharpe's ratio, the lower the risk at which the return of the fund is generated compared to safe investments.

Standard deviation – this ratio shows how risky the given fund is. The higher the ratio, the more volatile the price of a fund unit. This ratio is used to compare the risk of funds with a similar profile (e.g. equity funds).

This material is distributed to advertise or promote services provided by Generali Investments TFI S.A.

Presented financial information concerns the indicated period in the past and does not constitute a guarantee of achievement of similar results in the future. The result presented does not include front-load fees associated with investing in a given sub-fund or taxes. Front-load fees and applicable taxes may be deducted from the result.
