

GENERALI OBLIGACJE GLOBALNE RYNKI WSCHODZĄCE

Bond sub-fund

Generali Bonds Global Emerging Markets is a debt sub-fund whose assets are invested primarily in debt instruments of issuers from emerging countries (eg. India, South Korea, China, Malaysia, Indonesia, Brazil, Mexico, China) as well as from Poland, Central and Eastern Europe, including derivatives. The sub-fund is characterized by a lack of strict rules for the selection of investments to the portfolio and their high volatility. The selection of investments in the portfolio of the sub-fund is executed mainly on the basis of the current assessment and forecasts of the macroeconomic developments in the country of the issuer of the security and their impact on the market interest rates.

Sub-fund performance

Recommended minimal investment horizon:

Sub-fund performance*

	1 month	3 months	6 months	1 year	2 years	5 years	10 years
Generali Obligacje Globalne Rynki Wschodzące (%)	1.15	4.24	10.25	12.27	-	-	-

* Performance of the sub-fund is calculated on the basis of last working days of each month.
Data based on own calculations from September 30, 2019.

Maximum management fee	4%
Actual management fee	2%
Sub-fund Manager	Adam Szymko
Net asset value	9.53 mln PLN
Value of participation unit	108.42 PLN
Bank account numbers	30 1880 0009 0000 0013 0152 2000

Investor profile

The sub-fund is addressed to investors, who:

- are willing to participate in income from emerging market bonds,
- are willing to participate in the increase in the value and interest income from Sovereign bonds,
- have at least a 2-year investment horizon,
- want to reduce risk through geographic diversification,
- want to have a transparent, flexible form of investment with high liquidity,
- accept moderate investment risk.

This is not a sub-fund for investors, who:

- want to have a capital guarantee,
- have investment horizon shorter than 2 years.

Beta to WIG	0.34
Sharpe's ratio	1.54
Standard deviation	7.02%
Duration	8.14
YTM	4.25%

Dictionary

Beta to WIG – this ratio shows the relation between changes in the value of a fund unit and changes in the WIG index. Beta of 1 means that changes in the value of a fund unit are the same as changes in the WIG index. Beta below 1 means that a growth (decrease) in the benchmark by 1% is usually connected with a growth (decrease) in the value of the WIG index by less than 1%. Beta over 1 means that a growth (decrease) in the WIG index by 1% is usually connected with a growth (decrease) in the value of a fund unit by more than 1%.

Sharpe's ratio – this ratio shows the profitability of risk borne by the fund compared to safe investments (e.g. treasury bonds). The higher the Sharpe's ratio, the lower the risk at which the return of the fund is generated compared to safe investments.

Standard deviation – this ratio shows how risky the given fund is. The higher the ratio, the more volatile the price of a fund unit. This ratio is used to compare the risk of funds with a similar profile (e.g. equity funds).

Duration – this ratio shows the change in the value of the debt part of the fund in reaction to a change in interest rates. The higher the duration, the bigger effect of a change in interest rates on a change in the value of a fund unit i.e. the higher the risk connected with the same.

YTM – (yield to maturity) – this ratio shows the rate of return that investors obtain when buying a bond at the current market price and holding it in their portfolio until maturity.
