

GENERALI AKCJI EUROPEJSKICH

Equity sub-fund

The investment objective of the sub-fund is a long-term increase in the value of assets as a result of investment value growth. Generali Akcji Europejskich is the sub-fund of stocks of developed European markets. Generali Akcji Europejskich invests mainly in stocks of companies listed on stock exchanges of developed European countries, denominated in foreign currencies. The fund's portfolio mainly consists of stocks of companies with a stable and well-established market position, operating in various attractive and often technologically advanced industries that are not found in other markets. The exchange rate risk is being hedged by transactions in foreign currency derivatives.

On January 11, 2020, the investment policy and the name of the fund changed. Old name of the fund – Generali Akcje Biopharma.

Sub-fund performance

Lower risk, prospects of lower profits ← Higher risk, prospects of higher profits →

The discussed risk indicator is retrieved from Key Investor Information. The indicator is determined based on the historical volatility of the sub-fund's returns resulting from the investment policy implemented and may change in the future. Even the lowest risk category does not mean that the sub-fund is risk-free. Other risks associated with investing in a sub-fund that are not taken into account by the indicator are presented in the Key Investor Information and Fund Prospectuses.

Recommended minimal investment horizon:

Sub-fund performance*

	1 month	3 months	6 months	1 year	2 years	5 years	10 years
Generali Akcji Europejskich (%)	2.66	4.24	7.28	8.54	9.21	27,47	–

* Performance of the sub-fund is calculated on the basis of last working days of each month. Data based on own calculations from August 31, 2020.

Adam Woźny
Sub-fund Manager

The European stock market is often underestimated by investors, who see it through the prism of the region's macroeconomic indicators. However, when you pay attention to the wealth of fundamentally strong companies from sectors that are not present on other markets and the

fact that they often benefit from outside the European region, you will see a multitude of investment opportunities that are hard to find on other markets.

Risk measures (for 12 months)

Beta to WIG	0.64
Sharpe's ratio	0.43
Standard deviation	17.89%

Dictionary

Beta to WIG – this ratio shows the relation between changes in the value of a fund unit and changes in the WIG index. Beta of 1 means that changes in the value of a fund unit are the same as changes in the WIG index. Beta below 1 means that a growth (decrease) in the benchmark by 1% is usually connected with a growth (decrease) in the value of the WIG index by less than 1%. Beta over 1 means that a growth (decrease) in the WIG index by 1% is usually connected with a growth (decrease) in the value of a fund unit by more than 1%.

Sharpe's ratio – this ratio shows the profitability of risk borne by the fund compared to safe investments (e.g. treasury bonds). The higher the Sharpe's ratio, the lower the risk at which the return of the fund is generated compared to safe investments.

Standard deviation – this ratio shows how risky the given fund is. The higher the ratio, the more volatile the price of a fund unit. This ratio is used to compare the risk of funds with a similar profile (e.g. equity funds).

On January 11, 2020, the investment policy and the name of the fund changed. Old name of the fund – Generali Akcje Biopharma.
