

GENERALI ZŁOTA

Commodity instruments sub-fund

The investment objective of the sub-fund is a long-term increase in the value of assets as a result of investment value growth. Generali Złota is the sub-fund with exposure to gold. The sub-fund invests mainly in instruments with direct and indirect exposure to gold. The results of the sub-fund depend on the price of gold or other financial instruments issued by entities whose objects include gold exploration, mining, processing or trading. The sub-fund's portfolio mainly consists of such instruments as: gold exchange-traded commodities (ETC) classified as corporate debt instruments and exchange-traded funds (ETF), denominated in foreign currencies. In addition, the sub-fund may invest in stocks and other equity instruments. Some of its assets may be in the form of other categories of investments enumerated in the by-laws, in particular in the form of debt securities and money market instruments. The exchange rate risk is being hedged by transactions in foreign currency derivatives.

On January 11, 2020, the investment policy and the name of the fund changed. Old name of the fund – Generali Akcje Daleki Wschód.

Sub-fund performance

The discussed risk indicator is retrieved from Key Investor Information. The indicator is determined based on the historical volatility of the sub-fund's returns resulting from the investment policy implemented and may change in the future. Even the lowest risk category does not mean that the sub-fund is risk-free. Other risks associated with investing in a sub-fund that are not taken into account by the indicator are presented in the Key Investor Information and Fund Prospectuses.

Recommended minimal investment horizon:

Sub-fund performance*

	1 month	3 months	6 months	1 year	2 years	5 years	10 years
Generali Złota (%)	-1.04	-6.42	3.55	19.22	34.93	40.88	-

* Performance of the sub-fund is calculated on the basis of last working days of each month.

Data based on own calculations from October 31, 2020.

Dictionary

Sharpe's ratio – this ratio shows the profitability of risk borne by the fund compared to safe investments (e.g. treasury bonds). The higher the Sharpe's ratio, the lower the risk at which the return of the fund is generated compared to safe investments.

Standard deviation – this ratio shows how risky the given fund is. The higher the ratio, the more volatile the price of a fund unit. This ratio is used to compare the risk of funds with a similar profile (e.g. equity funds).

On January 11, 2020, the investment policy and the name of the fund changed. Old name of the fund – Generali Akcje Daleki Wschód.
